

# The bee-eaters in San Miniato

> **saturday 20.05.2023**

> **sunday 28.05.2023**

## Birdwatching around San Miniato.

In May, a multitude of birds show us all their splendid colours, finally returning to nest after a long journey that started in Africa. From the thousand colours of the Bee-eater, to the bright yellow of the wonderful Golden Oriole. Our trail starts in Balconevisi, from there we will head to the woods. Here we will have the chance to listen to the song of different bird species, such as the Golden Oriole, the Cuckoo and the Turtle Dove. During our circular hike, we will stop at vantage points to observe and photograph bee-eaters and, if we are lucky, even some predators of the sky, such as the Short-toed-eagle.

Join me in discovering new curiosities about our summer guests and their borderless journeys across continents!

**Meeting point** 9:00 am Piazza1° Maggio in Balconevisi (PI).  
Our circular walk will start from here.

**Rating of the walk** Moderate/Easy - Distance: about 13 Km / 8 miles; Difference in height + 250 meters
